

Quantity of shirts, y

$$\bar{y} = 10 = y_s$$

Feasible frontier when
specializing in shirts
and exchanging them for fish

$$y_e = 4.9$$

$$y_d = 4.5$$

$mrs = mrt$ (exchange)

Feasible
outputs

$$x_s = 0$$

$$x_d = 1.65$$

$$x_e = 3.4$$

$$\bar{x} = 5$$

$$6.67$$

Kilograms of fish, x
